

Narrow Footprint, High Profile  
Dairy/Deli Display

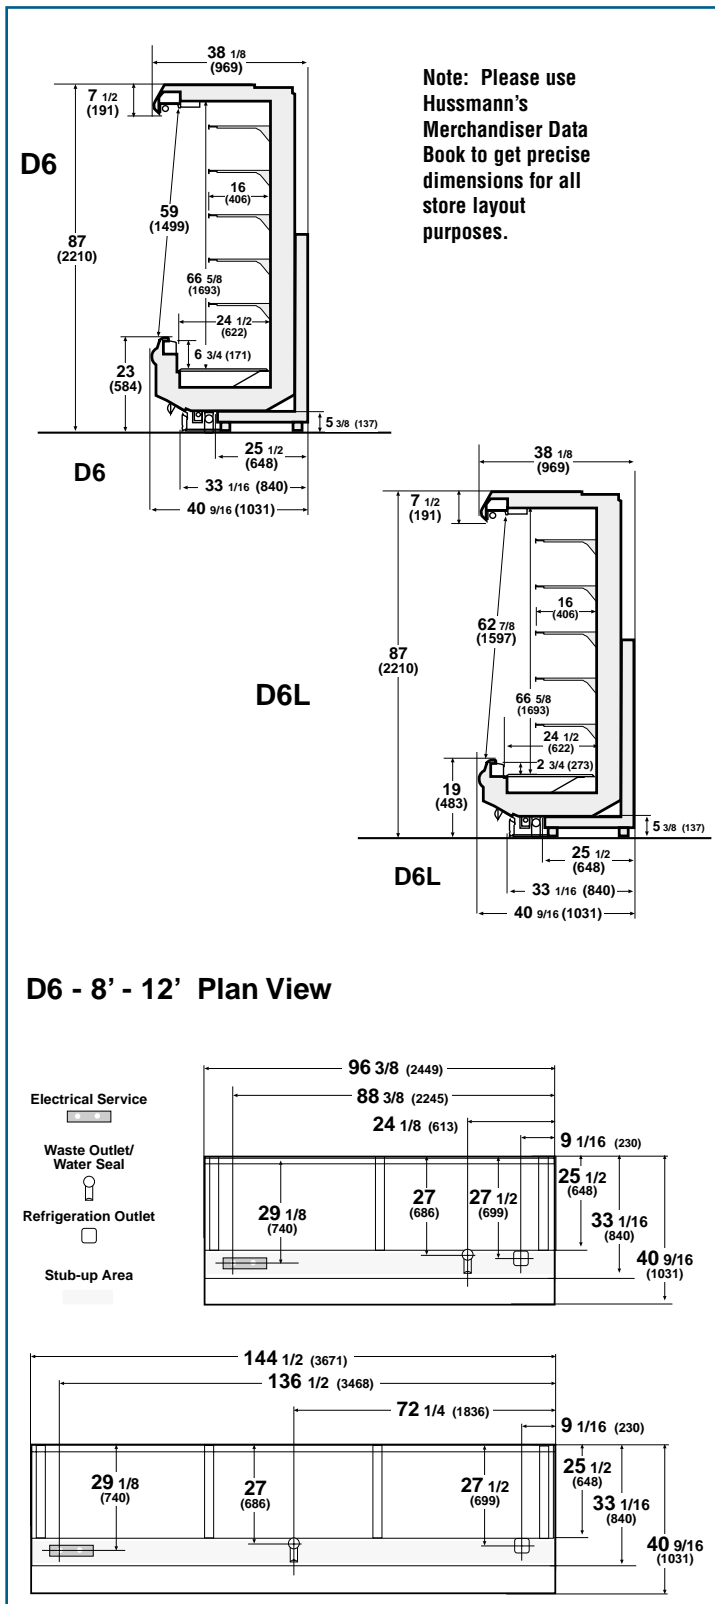

# Narrow Footprint, High Profile Dairy/Deli Merchandisers

D6 D6E L=Low Front  
 D6L D6LE E=High Efficiency Option

Available in 8' and 12' Lengths

## Modular Design

Breakthrough modular design with each 4 foot module containing separate coil, fan plenum and back panels.

## Reduced Refrigerant

50% to 60% less refrigerant needed in each merchandiser.

## Energy Reductions

Substantial reduction in energy use through modular coil, air flow and lighting features.

## Minimum Footprint, Maximum Product Facings

The D6 was designed to provide more display space in smaller floor space. The narrow footprint means wider aisle clearance, while added height allows more product facings.

## Superior Performance for Dairy or Deli Applications

Performance improvements include colder product temperatures, shorter defrosts and minimal variation in product temperature throughout display area, even during defrost.

## Easier Sanitation

One piece, high impact polystyrene bottom with seamless, radiused corners. Rear mounted coils and hinged modular fan plenums improve sanitation access.

## Durable, Solid Structure

True shock absorbing bumper system. Full length internal and external support frames. Heavy duty base and skids.

NOTE: These merchandisers are designed for use in stores when temperature and humidity do not exceed 75°F and 55% R.H.

NOTE: (We reserve the right to change or revise specifications and product design in connection with any feature of our products. Such changes do not entitle the buyer to corresponding changes, improvements, additions, or replacements for equipment previously sold or shipped.)
