P2 - Refrigerated Single or Multi-Deck Produce

P2E - Single or Multi-Deck Produce With High Efficiency Option

P2N - Non-Refrigerated Single or Multi-Deck Produce

Available in 8' and 12' lengths.

HUSSMANN®
IMPACT™ Merchandisers

Single or Multi-Deck Options

The P2 can provide a massive single deck display with full length (26") mirror. Up to two additional rows of shelves can be added for additional volume or variety. Mirrors are available in 8", 12", 16", 20" and 26" lengths. Shelves are available in 14", 16", 18" and 20" depths.

Less Refrigerant Needed

50% to 60% less refrigerant needed in Impact merchandisers compared to previous product lines.

Brighter, More Efficient T-8 Lights

T-8 lights with electronic ballasts are standard. Ballasts located in upper light channel.

Modular Design

Breakthrough modular design with each 4 foot module containing separate coils, fan plenums and back panels. This modularity produces many benefits, including more even refrigeration and greater structural integrity.

Excellent Refrigeration Performance

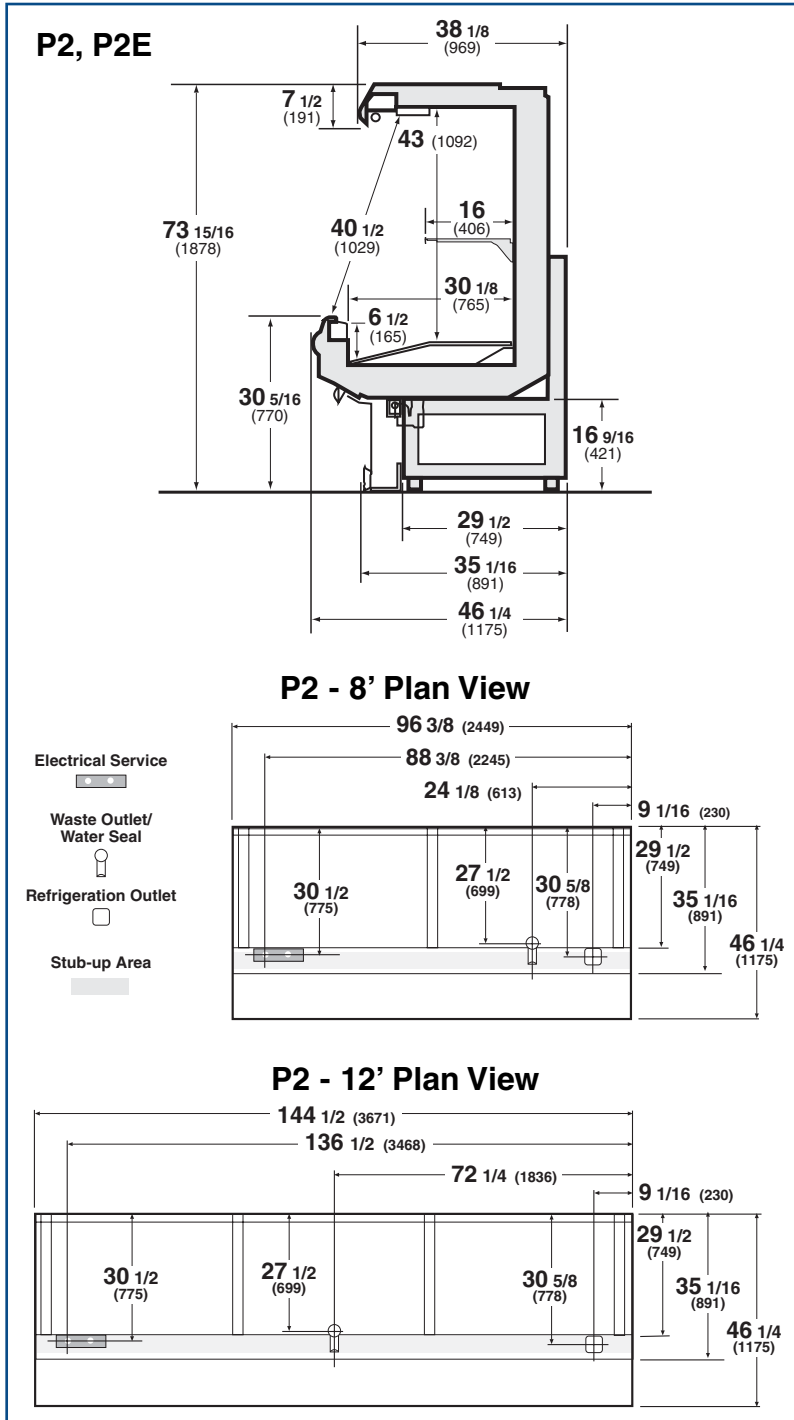

Performance improvements include colder product temperatures with minimal variation throughout the display area, even during defrost. Honeycomb discharge for improved air curtain.

Additional Options

Wide variety of panel and bumper colors, cut-down or extended base, rectangular or contour ends, energy efficient fan motors, wire baskets, fences, dividers, solid or wire shelves, step wire racks, spray hoses, bag dispensers and much more.

NOTE: These merchandisers are designed for use in stores when temperature and humidity do not exceed 75°F and 55% R.H.

NOTE: (We reserve the right to change or revise specifications and product design in connection with any feature of our products. Such changes do not entitle the buyer to corresponding changes, improvements, additions, or replacements for equipment previously sold or shipped.)

NOTE: Please use Hussmann's Merchandiser Data Book to get precise dimensions for all store layout purposes.
